

FLEXIBLE CURTAIN BARRIER SYSTEM

CBS SERIES

Isolation Systems, Inc's premiere flexible enclosure system has been developed specifically for environmental separation. This system can be utilized to create any class of clean area from class 100,000 to class 10. The versatility of this partition system is such that its use within your clean area is only limited by imagination. Offered as our standard enclosure barrier on our soft wall systems, this product can also be configured to create hood enclosures, process separators, bench shrouds and to establish multi-class environments within the shared room area. Its unique anodized aluminum mounting track system is offered in three configurations- flat wall, in-jamb and ceiling grid clip attachment, adding further to its versatility as well as its aesthetic appeal. Our standard system is offered in 40 mil polished and anti-static treated material. Optional thicknesses of up to 120 mil are also available. This extremely adaptable enclosure system will be custom tailored to your specifications. We assure your satisfaction with this unique product.

Thank you for considering **Isolation Systems, Inc.** for your airborne contamination control needs.
